

# Ice Cream Centre Filling Assist

Precision-perfect ice cream cones and sandwiches

## How it all started

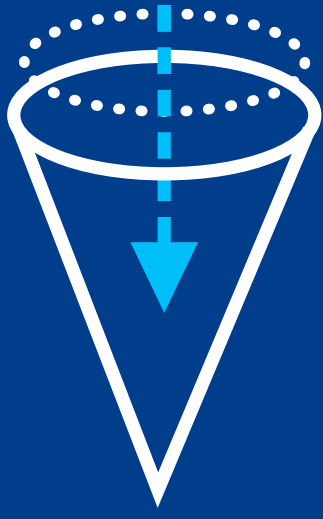

**Product waste issues at a customer site!**

*Our technician investigated and found the root cause of the problem: chain wear.*

*So ... could we somehow compensate for that chain wear?*

*A new, digital, sensor-based invention was born ...*

**... tried, tested and successful.**

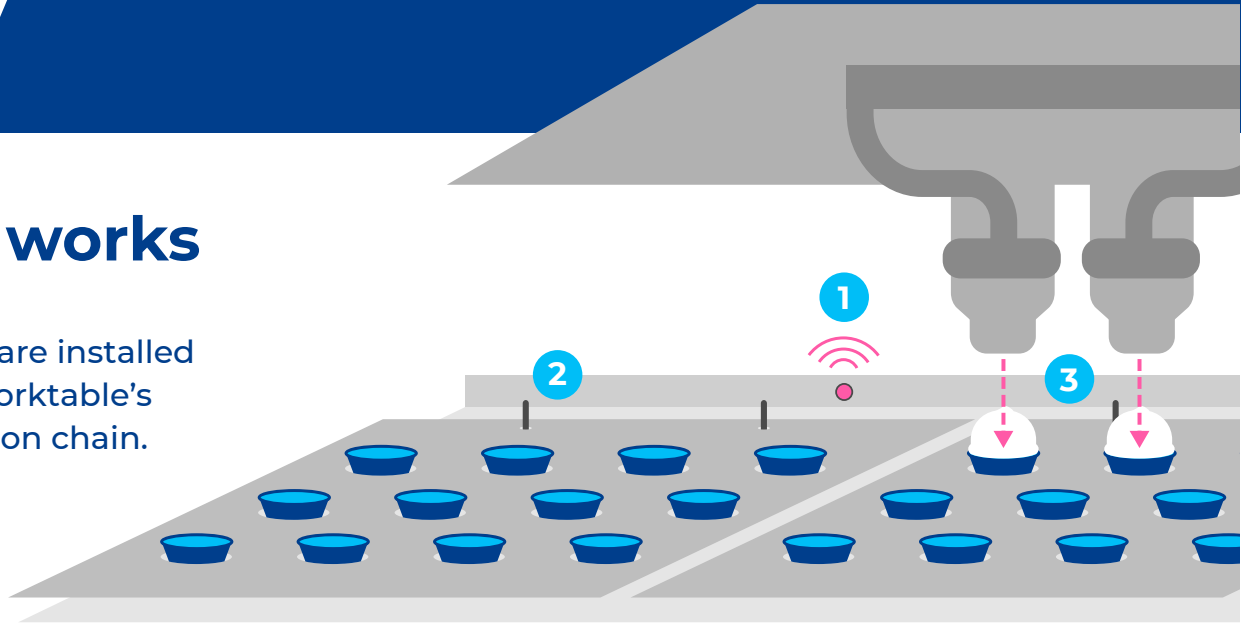

## Ice Cream Centre Filling Assist is here!

Making life a little easier for producers of ice cream cones, sandwiches and similar products.

## How it works

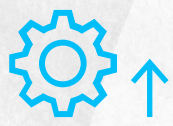

**1** Sensors are installed at the worktable's production chain.

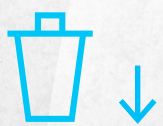

**2** The sensors measure time intervals between chain pins.

**3** Ice Cream Centre Filling Assist automatically adjusts for deviations.

## What Ice Cream Centre Filling Assist can do for you

**Make operators happy!**  
 Enhanced automation saves time

**Reduce product waste!**  
 Problems identified before it's too late

**Secure product quality!**  
 Get the right product appearance
